*The Lakeside Corporation  
Board of Directors and Staff*

## History

The Lakeside Corporation was founded in 1924 for the purpose of beautifying the property surrounding the Lake, and using it for the benefit and enjoyment of the members. The Club grounds and quarry area comprise over 3 acres and are enclosed on two sides by forty foot cliffs. The Lake holds approximately 3.2 million gallons of water and is filled and drained each spring and fall. The water is constantly filtered and chemically treated to insure that all standards established by the Louisville Metro Health Department are maintained.

## Directors

Lakeside is controlled by the certificate members through a Board of Directors comprised of seven individuals elected by their peers at the annual meeting. The Board meets monthly throughout the year to establish policy and review overall Lake operations. The Board functions principally through committees established by the president.

## Staff
